

PROFILE

I build AWS systems end-to-end - from infrastructure and delivery to production handoff.

Cloud & Platform Engineer and AWS Solutions Architect with a decade of enterprise IT experience and three deployed AWS products. I design and ship event-driven, serverless, and containerized systems using infrastructure-as-code, OIDC-based CI/CD, and cross-account observability, with operational readiness built in from day one.

AT A GLANCE

10+ years enterprise IT
3 deployed AWS products
2026 AWS SAA certified
5+ years independent engineering

SELECTED CLOUD ENGINEERING WORK

RabbitHole INDEPENDENT PROJECT

LIVE GITHUB

Event-driven AI video platform on AWS with adaptive-bitrate HLS delivery, live WebSocket status, speech indexing, and semantic search.

ECS Fargate · EventBridge · SQS · Lambda · ffmpeg · AWS Transcribe · Terraform · OIDC CI/CD

- Chose ECS Fargate over Lambda for CPU-bound, long-running ffmpeg transcoding where Lambda limits and cold starts would hurt the experience.
- Decoupled uploads with EventBridge and SQS so the API never blocks; the processing fleet scales to zero between jobs.
- Eliminated long-lived deployment credentials with OIDC-based GitHub Actions and remote Terraform state.

QuicLens CO-FOUNDER / CLOUD ENGINEER

LIVE

Multi-tenant research analytics SaaS for neurodegenerative disease and prion research labs, replacing manual R scripts and Excel with structured cloud-native analysis.

TypeScript · AWS CDK · Lambda (Docker) · API Gateway · DynamoDB · WorkOS SSO · React · FastAPI

- Built a 92-test validation suite against researcher-validated ground truth before a user touched the platform.
- Enforced tenant isolation at the DynamoDB partition key and IAM boundary, not only in application logic.
- Moved scientific Lambda workloads to Docker containers after ARM-incompatible libraries failed under the managed runtime.

PureZen INDEPENDENT REBUILD

LIVE GITHUB

Originally built as an AWS Academy capstone, then rebuilt as a fully serverless AI spa-booking platform with a conversational concierge and data-backed admin assistant.

AWS CDK · Lambda · DynamoDB · Anthropic Claude · Ollama · React · FastAPI

- Rebuilt beyond AWS Academy sandbox constraints after diagnosing 10-40 second CPU-only Ollama response times; moved inference to Anthropic Claude and a fully serverless architecture.
- Resolved availability deterministically against live DynamoDB state rather than generating it with the model.
- Used regex-first routing for routine requests and Anthropic tool use for data-backed admin queries.

EXPERIENCE

Independent Engineer · Product & Infrastructure 2021-Present

RabbitHole · QuicLens · PureZen

- Design and ship deployed cloud systems end-to-end in isolated AWS environments using infrastructure-as-code and automated delivery.
- Apply enterprise-grade operational readiness: observability, documentation, supportability, security boundaries, and clean handoff.

IS Supervisor · Scrum Master 2025-Present

Mutual of Omaha · Omaha, NE

- Lead a 24-person enterprise IT service desk and serve as a technical escalation point for platform and infrastructure issues, coordinating changes across engineering, infrastructure, identity, and security.
- Analyze incident and support telemetry and own knowledge standards to surface systemic platform issues and improve operational readiness.

Technical Lead · Scrum Master 2022-2025

Mutual of Omaha · Omaha, NE

- Owned technical intake, dependency management, and release readiness across engineering and infrastructure teams.
- Coordinated major platform changes between engineering and service operations, translating implementation dependencies into support and rollout readiness.
- Built KPI dashboards for delivery trends, capacity, and risk used by leadership.

Business Systems Consultant · Scrum Master 2019-2022

Mutual of Omaha · Omaha, NE

- Translated business requirements into detailed technical stories across multi-team delivery streams.
- Partnered with security and data teams on compliance and integration requirements.

Senior Service Desk Analyst 2015-2019

Mutual of Omaha · Omaha, NE

- Provided advanced troubleshooting across applications, platforms, and infrastructure in a high-volume enterprise environment.
- Authored knowledge content that improved engineering-ticket quality and reduced rework; led onboarding and training.

TECHNICAL PROFILE

CLOUD + EVENT-DRIVEN

AWS CDK · Terraform · Lambda · ECS
Fargate · API Gateway · EventBridge ·
SQS · DynamoDB · S3 · CloudFront

PLATFORM + SECURITY

GitHub Actions CI/CD · IAM · OIDC ·
WorkOS SSO · CloudWatch ·
Cross-account observability · Docker ·
Multi-tenant architecture

APPLICATION

TypeScript · Python · JavaScript ·
FastAPI · REST APIs · React · Vite ·
Tailwind CSS

APPLIED AI

Anthropic Claude · Ollama · AWS
Transcribe · Vector Embeddings ·
Semantic Search · Anthropic Tool Use

EDUCATION +
CREDENTIALS

AWS Solutions Architect - Associate
Amazon Web Services · 2026

MS, Management Information Systems
+ MBA (Dual)
University of Nebraska - Omaha ·
2024-Present

BS, Management Information Systems
University of Nebraska - Omaha · 2020-2023

Systems Development Certification
University of Nebraska - Omaha · 2023
